

Activity Resource: Videos on Demand

LifeShare Videos Channel

LifeShare CommunityShares have the ability to play videos uploaded by Admin on-demand. Videos can be uploaded from a file or YouTube link. Video content can range from cute animal videos that will make people laugh to educational TEDtalks.

How To Access Videos On-Demand

All videos uploaded on the Admin side of LifeShare can be accessed on the CommunityShare through on-demand. If the slideshow is currently playing, push the black LS button on the remote to get to the Home Channel. Navigate the channels to Videos. Choose a video to play by clicking on it, but make sure the volume on the TV is turned up if the video contains sound.

How to Upload a Video on the Admin Page

Once logged into the CommunityShare Admin, click the channel that says "Videos." Click the blue button in the right corner that says "Add." Choose the video origin: File on my computer or YouTube. Once you have chosen the origin of the video, you will be able to give a caption, select a date range for the CommunityShare slideshow, and determine the frequency the video will appear in the slideshow.

Once you save your work, you will be able to hide the video from the CommunityShare slideshow if you only want the video accessible in on-demand mode. To make the video only accessible in on-demand mode, push the blue "Hide" link under the video's information. The video will fade in color, but it will still be available through your Videos Channel on-demand.

Video Ideas

The Andy Griffith Show and I Love Lucy (full episodes on youtube)

Fitness Videos

How To Videos (knitting, cooking, origami, etc)

Viral Videos (cute animals)

Educational Videos (TEDtalks)

Community Marketing Videos (For Prospective Residents and Families)

Use either a .mp4 or .mov file format. If you need help converting your file, please contact LifeShare Support.
