

## LifeShare for Memory Care

### What is LifeShare?

LifeShare connects to your loved one's TV through a special box. It connects to the internet and allows access to therapeutic tools, cognitive support, and family engagement tools. The simplified menu allows you to easily facilitate use and engage your loved one.

### Why Use LifeShare?

LifeShare helps provide comfort and gentle brain stimulation. Our loved ones have passions in their long-term memories that can continue to bring joy and happiness to their lives. Whether through faith, music, pictures, or videos, LifeShare can help embrace the past and bring joy to their present days. We encourage you to use LifeShare with your loved one while visiting. It will provide both an activity for conversation and reminiscing, as well as activities that can be therapeutic and comforting.

### Why Create a Family Manager Account?

A free Family Manager Account allows you to manage your loved one's LifeShare. You are able to quickly upload pictures (past family pictures, present family pictures, hobbies, activities, pets, interests, favorite places) into the LifeShare picture slideshow. Family Managers are able to manage from either a computer or a mobile device like a smartphone or tablet.

### How Can I See Community Information?

Family Managers will see community information with their login, but others can use the mobile app and the Community Access Pin: WTOC

### What Should I Do Together with My Loved One?

- Watch the picture slideshow
- Listen to music
- Play a Game
- Listen to a Podcast
- Listen to Faith Programs
- Look at the News\*

\*You Can Customize News Subjects with a Family Manager Account\*
